Health care ethics is the field of applied ethics that is concerned with the vast array of moral decision-making situations that arise in the practice of medicine in addition to the procedures and the policies that are designed to guide such practice. Of all of the aspects of the human body, and of a human life, which are essential to one's well-being, none is more important than one's health.

Having argued that existing approaches to healthcare robotics are interesting and valuable but arguably not sufficient to make a material and substantial difference to the design, use and societal consequences of healthcare technologies such as care robots, we use this section to explore alternative ways of understanding, highlighting and implementing ethical aspects.

~~Ethics of healthcare robotics: Towards responsible ...~~
Medical ethics shares many principles with other branches of healthcare ethics, such as nursing ethics. A bioethicist assists the health care and research community in examining moral issues involved in our understanding of life and death, and resolving ethical dilemmas in medicine and science.

~~Bioethics - Wikipedia~~
Health ethics is the branch of ethics that deals with ethical issues in health, health care, medicine and science. It involves discussions about treatment choices and care options that individuals, families, and health care providers must face. It requires a critical reflection upon the relationships between health care professionals and those they serve, as well as the

~~Ethical Healthcare Consulting CIC~~
Because beneficence is a fundamental principle of healthcare ethics, e thical egoism (i.e., the belief that our primary obligation is to ourselves and that self- ishness is a virtue) is disconnected from health care. This is true because most people enter health care as a profession because they want to help people.
