Introduction to Macro Variables. Macro variables are tools that enable you to dynamically modify the text in a SAS program through symbolic substitution. You can assign large or small amounts of text to macro variables, and after that, you can use that text by simply referencing the

# Download Free 130 30 Sas Macro Variables And

variable that contains it. Macro variable values have a maximum length of 65,534 characters.

## ~~Macro Variables: Introduction to Macro Variables~~

Using Macro Variables. After a macro variable is created, you typically use the

# Download Free 130 30 Sas Macro Variables And

Simple Macro Programs  
variable by referencing it with an ampersand preceding its name (&variable-name), which is called a macro variable reference. These references perform symbolic substitutions when they resolve to their value. You can use these references anywhere in a SAS program.

## ~~Macro Variables : Using Macro Variables~~ ~~Sas Institute~~

Global macro variables are variables that are available during the entire execution of the SAS session or job. A macro variable created with a %GLOBAL statement has a null value until you assign it some other value. If a global macro variable already

# Download Free 130 30 Sas Macro Variables And

exists and you specify that variable in a  
`%GLOBAL` statement, the existing value  
remains unchanged.

~~SAS Macro For Beginners — Macro  
Variables & Functions ...~~

Macro variables are identified in SAS  
code by preceding the macro variable

# Download Free 130 30 Sas Macro Variables And

name with an ampersand. Thus the macro variable DSN will WHERE

SEX="&SEX"; be coded as &DSN.

**TECHNICAL TIP:** Professional SAS

programmers always refer to the ampersand as "amper" when reading code, and only novice programmers pronounce the full word. The first step in

# Download Free 130 30 Sas Macro Variables And

Understanding macro variable behavior is to understand how macro variables are resolved.

~~Five Ways to Create Macro Variables: A  
... Sas Institute~~

And the reason why the title needs to be a macro variable of macro variables is that the %MACRO loops through the data (produces multiple graphs from subsets of input data). And the t1,t2 etc. contains the current value of the "by" variables which

# Download Free 130 30 Sas Macro Variables And

Simple Macro Programs  
are used for the subsetting. So in other words the title changes throughout the %MACRO itself.

~~Solved: Macro variables inside a macro variable - SAS ...~~

Too often I see hundreds of sas files contain macros with no documentation

# Download Free 130 30 Sas Macro Variables And

Simple Macro Programs with no examples, macro definitions with no relevance, useless macros (for instance why write a `mysort()` macro rather than use `proc sort`, it may save you a character or two to type, but if your not the initial programmer then it is not transparent - look up obfuscation), no consistency, and macros which just don't work outside ...
