Bacteria: Fossil Record. It may seem surprising that bacteria can leave fossils at all. However, one particular group of bacteria, the cyanobacteria or "blue-green algae," have left a fossil record that extends far back into the Precambrian - the oldest cyanobacteria-like fossils known are nearly 3.5 billion years old, among the oldest fossils currently known.

The fossil record suggests that the early ancestors of our species appeared about 4.5 million years ago. The first fossils of Homo sapiens may have appeared as early as 200,000 years ago in Africa. According to one hypothesis, members of our species migrated from Africa and ultimately colonized the world.
