However, when sprayed as a mist and mixed with air, it is quite explosive. All it needs is a spark. Two-stroke engines require that oil be mixed with the gasoline to lubricate internal parts. Four-stroke engines use a fuel-air mixture. Fuel Tank: The fuel tank stores fuel in preparation for mixing by the carburetor and use by the engine. Some ...

eBay

In order for an engine to start running, the carburetor must have a supply of fuel. In many cases with small engines, there will appear to be gas when in actuality none is getting to the engine. Try rocking the engine back and forth to listen for fuel sloshing. If you have a gas canister, try filling the tank up and giving it another shot.
