The fill valve is the part of the toilet that is responsible for refilling the tank after being flushed. Over time, a worn or out of alignment fill valve can become a problem, cause a leak, and wear on valve's components and parts. If your fill valve leaks, or if water continues to run after you flush, it may be time to replace the fill valve.

Your A/C low side charging adapter connects a charging manifold to the A/C compressor so you can recharge the refrigerant in your vehicle. Recharging may be necessary after servicing the A/C system or if you have a refrigerant leak. Low side charging adapters handle refrigerant at a lower pressure, unlike high side charging adapters.
