Guide to Choosing Joint Supplements for Horses. For the most part, joint supplements for equines are usually very effective at restoring your horse's health. As long as they contain active ingredients like Chondroitin sulfate, MSM, hyaluronic acid, and Yucca, they will heal your horse's joints. However, the nature of the supplement also matters.

The metacarpophalangeal (MCP) joint is known to be the equine joint most susceptible to damage. 55 It is the MCP joint that, together with the carpal joint, has received most attention in terms of effect of exercise. This can be explained to a large extent by the high incidence of condylar fractures in the MCP joint and of third carpal bone slab fractures in the carpus in racehorses.
