Some people believe they're bad at directions and get nervous when they have to navigate on their own. In a second replication, this is exactly what the researchers found.

~~Why Certain People Have a Terrible Sense of Direction ...~~

Non-Western societies that practise navigation without technology often have an enviably good sense of direction, like the Polowat islanders in the Western Pacific who sail canoes by the currents and stars. In Bali, where direction has a heightened spiritual meaning, 'not knowing which way North is' is considered a symptom of insanity.

~~Why some people have a good sense of direction - BBC ...~~

According to Dr. Azizi, the best way to improve your sense of direction is to practice using our two modes of mental navigation (memorizing directions via landmarks and calculating distances) at the same time. "Some people are really good at navigating by objects in the environment, the function of object memory," Azizi told WebMD. Others tend to rely on distances, such as remembering to go 40 yards to the north and then 40 yards to the west.

Dromosagnosia, or why some people lose their sense of direction while driving. We coined a new word, "dromosagnosia", from the Greek words, dromos ("way, road")+agnosia, to describe the loss of direction while driving, an orientation disorder similar to but different from pure topographic disorientation. Historically, human beings have moved more quickly, from using domesticat
