Abap Selection Screen Guide - orrisrestaurant.com

Sometimes users might want to have more flexible functionality to select the data from the view/table viz., a selection-screen to select the data. Add selection-screen to TMG of a table/view: We all agree to the fact that the TMG function group should never be manually altered & any modifications should be handled via TMG events .

Using selection-screen in Table Maintenance Generator ...

Selection Screen. The second type of dialog objects in ABAP is a selection screen. What is its main difference from classic selection screens? The thing is pretty self-explanatory and lies in the name: they are used for selection of data from database. Classic screens can carry this function too but selection screens do this significantly better and here is why: they do not need to be created in advance but are rather declared via a set of declarative statements.

SAP ABAP Dialog Programming - Free SAP ABAP Training

When you call the selection screen, and when users interact with it, the ABAP runtime environment generates selection screen events, which occur between INITIALIZATION and START-OF-SELECTION. You can define event blocks for these events in your program to change the selection screen or process user input.
