I've read elsewhere that the motherboard is an ACER B46H5-AD. I can't find a manual on one of those either. However I really don't need on. The picture you've attached is great. What I really needed to see is where the m.2 connection is. Which is #8 by the looks of it . 0.

Acer won't acknowledge a quality issue because of the ramifications. So they lose one customer at a time, me being one of them. They have the ability to correct issues on a case by case basis but refuse. If you are out of warranty you can't even talk to someone at Acer , it goes to a third party service. That's their customer service. Pathetic.

you may be able to downgrade it by downloading an older version from the manufacturer's website and repeating the flashing process.

How to Check Your BIOS Version and Update it

Below you can download the latest Acer bios upgrade for your motherboard after signup with the eSupport BIOSAgentPlus service. You can identify your motherboard using the BIOS ID which is displayed on most computers at bootup. Per BIOS vendor (AMI, Award, Phoenix, ...) we have a seperate tab of motherboard BIOS Identifications.
