Action Research for Climate Change Adaptation: Developing ...

Together, we will establish an Observatory for Climate Recovery, directed by a world-leading climate scientist, where we will exploit the huge amounts of data needed to understand climatic trends and take action. Our experts will focus on gathering, tracking and analysing data – whether from container ships, submarine explorations, satellites or the phones in our pockets.

Climate Change Research - About - UEA

Eighty-seven per cent of UK adults accept that the climate is changing, with human activity being solely or partly responsible, the research found. Just over half of the population (57 per cent) think that the worst consequences of climate change can be avoided, but only by making “radical” societal changes.

Most UK adults feel ‘radical’ action necessary to combat ...

The Climate Action Gateway brings together all content published on F1000Research related to climate change, its causes, impacts and potential solutions; making the information rapidly and openly accessible for others to consult and use, thus supporting the development of effective scientific, policy, economic, social and behavioural responses.

Climate Action | Research Gateways | F1000Research

The Guide nevertheless presents a generic set of concepts and tools that is likely to be of use to others engaged in climate change adaptation research and development efforts in the region, or those working to address other development challenges requiring a multistakeholder learning-by-doing approach.

Action Research for Climate Change Adaptation: Developing ...

The Ashton Hayes project has estimated a 20% reduction in carbon emissions so far with the broader benefits of their project being an aspect of wider social narrative; i.e. it has become 'normal' for villagers to openly discuss climate change issues and the actions taken to reduce their carbon emissions.

Best practice review of community action on Climate Change ...

Climate change is a proven fact. Global warming has caused serious changes to the planet, such as rising sea levels, extreme weather events, deforestation, disappearance of species ... But, as individuals we can slow down global warming by implementing small more sustainable actions within our community. Let us tell you about daily habits that can be adopted to fight global warming locally, through 6 simple actions that can result in big changes.

6 actions to fight climate change - Sustainability for all

But research has shown that the current climate change is largely a result of human activities since the mid-20th century. 4 Human activities such as burning oil or gas and cutting down forests, is increasing the concentration of greenhouse gases like carbon dioxide that trap heat in the Earth's atmosphere.

Climate change | ActionAid UK

We conduct scientific research on public climate change knowledge, attitudes, policy preferences, and behavior, and the underlying psychological, cultural, and political factors that influence them. We also engage the public in climate change science and solutions, in partnership with governments, media organizations, companies, and civil society, and with a daily, national radio program, Yale ...

30 October 2020. The Intergovernmental Panel on Climate Change (IPCC) warns that averting the most serious consequences of climate change requires a radical overhaul of the global economy. The Financial Stability Board's Task Force on Climate-related Financial Disclosure (TCFD) provides the first industry-driven reporting framework enabling financial sector stakeholders to account for the financial impact of climate change on businesses and take action to address this.

Engagement, Research, and Policy Resources - ShareAction

Top climate experts, including the authors of the Fourth National Climate Assessment and the Intergovernmental Panel On Climate Change Special Report, have all concluded that human activities are estimated to have caused an approximate 1.0°C rise in the Earth's global temperature to date. Excessive CO2 emissions caused by human activities, such as the burning of fossil fuels, have ...

Plan for Climate Change and Environmental Justice | Joe Biden

The Place-based Climate Action Network (PCAN) is a £3.5m research network funded by the ESRC that has been set up to enable cities, towns and communities to build local action on climate change (<https://pcancities.org.uk>). The five-year research project, which launched on 30 January 2019, brings together the research community and decision-makers in the public, private and third sectors.

New funding for local climate change projects announced ...

On 8 October, the Intergovernmental Panel on Climate Change (IPCC) issued a Special Report on the impact of global warming above 1.5 °C, providing policy-makers with a strong scientific basis for their efforts to tackle climate change. The report shows that achieving this goal is possible, provided we act now and use every tool at our disposal.

Climate Action | Environment - Research and Innovation ...

The report, Cities Leading the Way: Seven climate action plans to deliver on the Paris Agreement, showcases seven cities with climate action plans that put the city on a path to become emissions neutral by 2050 and more resilient to the impacts of climate change. [Learn More](#)
