Advanced Java

introduces students to

intermediate and advanced features of the Java programming language.

Students will learn about object-oriented programming concepts such as

inheritance, interfaces, abstract classes, abstract methods, and polymorphism;

will learn how to write and read Java primitive types to and from files; how to

serialize objects, and how to implement graphical user interfaces using Java's FX components.

and Web programming using Java. Liang approaches Java GUI programming using JavaFX, not only because JavaFX is much simpler for new Java programmers to learn and use but because it has replaced Swing as the new GUI tool for developing cross-platform-rich Internet applications on desktop computers, on hand-held devices, and on the Web.
