Air Conditioning And Refrigeration Troubleshooting

When doing air conditioning troubleshooting, you should consult your thermostat manual to make sure you have programmed your thermostat properly. 3. Air conditioner problems are not cool – low refrigerant equals low efficiency While air conditioning troubleshooting uncovers an under-performing unit, that can be the result of low refrigerant. If the refrigerant level is low, it usually means it was either undercharged at installation or it has a leak.

Air Conditioning Troubleshooting: 9 Common Problems ...

(1) Operate the air conditioner in mould proof operation on a sunny day to let the inside of the unit dry thoroughly. (2) After the cleaning operation stops, unplug the power cord or turn off the dedicated circuit breaker for the air conditioner. (3) Remove the batteries from the remote controller. Did this solve your problem?
