Let n be a randomly selected integer from 1 to 40. Find the indicated probability.

- n is prime given that it is even.
- n is 15 given that it is a multiple of 3.
- n is 32 given that it is greater than 25.
- n is 13 given that it is odd.

Algebra 2 Worksheets (pdf) with answer keys
In algebra, a quadratic equation (from the Latin quadratus for "square") is any equation that can be rearranged in standard form as $ax^2+bx+c=0$ where x represents an unknown, and a , b , and c represent known numbers, where $a \neq 0$. If $a = 0$, then the equation is linear, not quadratic, as there is no ax^2 term.
