It was similar but unrelated to the Sega TeraDrive. It is a standard Amstrad PC with Sega Mega Drive hardware bundled inside; the system was wired to share the dual-sync monitor and speakers with the Mega Drive on a separate circuit board.

Amstrad Mega PC - Wikipedia

The Mega PC was a system produced by Amstrad under license from Sega with Mega Drive and IBM -compatible PC functionality in one. The Mega PC was similar in concept to the TeraDrive, but was an unrelated project. The PC section used an Intel i386SX running at 25 MHz. It had 1 MB of RAM and a 40 MB hard disk drive.

Amstrad Mega PC 386SX - Computer - Computing History

In 1993, Amstrad was licensed by Sega to produce a system which was similar to the Sega TeraDrive, going by the name of the Amstrad Mega PC, to try to regain their image in the gaming market. The system didn't succeed as well as expected, mostly due to its high initial retail price of £999.

Amstrad Mega PC - Console Gaming in an IBM-PC Compatible ...

The Mega PC unlike the console was region free, which meant you could play JAP and US games through the computer. I have to admit, playing Mega Drive games on the Amstrad PC was a revelation at the time, especially when you consider the crystal clear VGA display! The bad bits: Due to some unforeseen non-standard Mega Drive cartridges, around 5% of games suffered in the compatibility department. For example, Mega Probotector and Populus couldn't run without open heart case modification.

The Amstrad Mega PC - 1992-93 - Classic Replay

The Amstrad had several games installed also, including some great mech game (top down) and an early version of Elite. It came with 1mb of ram, I remember this because we bought the pc version of mortal kombat and had to upgrade it to 4mb to get it working.

Amstrad Mega PC - retrobattlestations

Amstrad's final PC product was the unusual Amstrad Mega PC which also had a Sega Megadrive built in. Today the Amstrad PC1512 and PC1640 are quite collectible, with prices going up to £650 (€ 720) or so for a top-of-the-range unit in good condition. Old computers take up a lot of space, so survivors are uncommon.
