This is what is known as a Programming paradigm, which essentially means that it is a specific way of doing something or structuring your code. What OOP means is that you structure your code around objects which is good for building frameworks and tools or making the code more usable and scalable. These objects essentially store both data and methods in a single structure, which can be

Object-oriented programming is one of the most effective approaches to writing software. In this approach of programming, you write classes that represent real-world things, and you create objects based on these classes. When you write a class, you define the general behavior that a whole category of objects can have.
