Manual Calibration: This is the preferred method for "SU" series Smart-UPS, or any time that a User Commanded Calibration is not possible Stop the Power Chute software from running and disconnect the serial, USB, or Ethernet cable (s).

[How do I perform a Battery Calibration on my Smart-UPS?](#)

Apc Ups Calibration Manual During normal operation, your Smart-UPS will display an estimated runtime via the software, network management card, or LCD screen. This runtime will vary depending on the load attached, the battery charge, and the age of the batteries. Performing a calibration forces the UPS on battery, drains the battery down, and charges it back up. APC Smart-UPS 700 120V - APC ...

A runtime calibration is required at initial start-up, when additional batteries are added, old batteries are replaced or if the estimated runtime is found to be inaccurate. Do not use old batteries (two or more years old), and new batteries together. Refer to the Perform a UPS Runtime Calibrationsection in this manual for calibration criteria.

[Installation and Operation](#)

If you do a manual calibration, you won't need to wait for the UPS to say 100% vs. 99% but you'll need to sit and watch the UPS and make sure you reapply AC power to it when its complete. The software command will discharge the UPS down to 10-20% and charge itself back up with out you sitting there.
