Apportionment Requirements. A Corporation doing business only in Colorado will compute its tax on 100% of the Colorado taxable income. However, a corporation doing business in more than one state must apportion its taxable income to any states in which the corporation is doing business. The apportionment methods reduce the income subject to Colorado taxation by comparing certain Colorado revenue, expenses, and assets to the total revenue, expenses, and assets of the corporation.

Formulary apportionment, also known as unitary taxation, is a method of allocating profit earned (or loss incurred) by a corporation or corporate group to a particular tax jurisdiction in which the corporation or group has a taxable presence.

[Formulary apportionment - Wikipedia](#)
The apportionment formula consists of the sum of the property factor, the payroll factor and twice the sales factor divided by four. If the sales factor does not exist, the denominator is the number of existing factors. If a property or payroll factor does not exist, the denominator is the number of existing factors plus one.
