Philip Micklin is a scientist. He studies the Aral Sea. In 2010 he said ‘Nature can come back.’ But in 2014, he saw satellite pictures of the east part of the Aral Sea. It was completely dry. In June 2015 a scientist from Uzbekistan, Yusup Kamalov, and a National Geographic reporter visited the Aral Sea. They found a huge desert.

The Story of the Aral Sea | NGL Life

The World Bank followed up with an effort to restore delta and wetland habitats on the Uzbekistan part of the Aral Sea through the Drainage, Irrigation and Wetlands Project. The project is based on a successful pilot program that saw the restoration of the 100,000 acre (40,000 hectare) Lake Sudochi elsewhere in the region.

Once Left For Dead, The Aral Sea Is Now Brimming With Life ...

October 14, 2014. Images of the shrinking Aral Sea in Central Asia acquired by NASA satellites on August 25, 2000 (1) and August 19, 2014. The Aral Sea was once the world's fourth largest lake, but has lost most of its water due to diversions of the rivers that sustained it. Images courtesy of NASA. The satellite image of the Aral Sea recently released by NASA just about knocked my socks off.

What the Disappearing Aral Sea Tells Us about the Value of ...

The Aral Sea (Aral / 'ær əl /; Kazakh: Aral teñizi, Арал теңісі, Uzbek: Orol dengizi, Орол денгизи, Karakalpak: Aral ten'izi, Арал тенизи) was an endorheic lake lying between Kazakhstan (Aktobe and Kyzylorda Regions in the north) and Uzbekistan (Karakalpakstan autonomous region in the south) which began shrinking in the 1960s and had largely dried up by the ...

Aral Sea - Wikipedia

Talk about a sea change: From 2006 (bottom) to 2009, Central Asia's vast Aral Sea dramatically retreated, with its eastern section losing about 80 percent of its water in just four years. The sea level of this already-shallow lake dropped about 16 meters (52.5 feet), while its shoreline recede d up to 120 kilometers (75 miles).

Disappearing Lake | National Geographic Society

The North Aral Sea (sometimes called the Small Aral Sea) had separated from the South (Large) Aral Sea. The South Aral Sea had split into eastern and western lobes that remained tenuously connected at both ends. By 2001, the southern connection had been severed, and the shallower eastern part retreated rapidly over the next several years.

World of Change: Shrinking Aral Sea - NASA

A parallel crisis severely damaged the Aral Sea (2, 3), located between Kazakhstan and Uzbekistan. The action taken in response could provide a model for lakes suffering from desiccation. Starting...
