59 sound projects Trigger an mp3 effect when someone is passing by. Three different projects for three different levels of coding.

59 sound Projects - Arduino Project Hub
Project Several projects require sound reproduction to add some kind of functionality. Among these projects, we highlight: accessibility for the visually impaired, MP3 music players and the execution of voice sounds by robots, for example. In all of these systems, we need an MP3 sound reproduction device to connect to the Arduino.

How to use the DFMini Player MP3 Module with Arduino ...

So here is easiest and cheapest way to interface SD card with arduino. you can use the audio output from arduino via a switch or sensor. you can play any type of sound,music and recording but that audio will be in to.wav file. If it is in.mp3 or any other audio type then we will convert it into.wav file.

Audio Player Using Arduino With Micro SD Card : 7 Steps ...

In order to have the Arduino access the LEDs, you have to build a small circuit on a solderless breadboard. The breadboard has two parts: the inner rails (which run width-wise) and the outer rails (which run length-wise). The rails are electrically connected along their lines, so you can connect components without actually soldering them together.
