Armature Winding And

To check the condition of the armature windings, the armature will probably have to be removed from the motor. However, if the motor design has external brush holders, you can unscrew the brush caps and remove the brushes. Depending upon brush size, this may allow access to the commutator without removing the

DC motors will have a field frame that contains the field coils and an armature with windings wrapped around a core made of iron. The ends of the armature windings are connected to a commutator which allows each of the armature coils to be energized in turn via carbon brushes (except in the case of a brushless motor,
