This paper offers a comparative study of India and China in higher-education reforms for the development of talent in artificial intelligence (AI), and in AI research. It analyses the AI development plans and strategies of the two countries, their automation readiness index, talent retention, and research output.

The development of full artificial intelligence could spell the end of the human race. Once humans develop artificial intelligence, it will take off on its own and redesign itself at an ever-increasing rate. Humans, who are limited by slow biological evolution, couldn't compete and would be superseded. —
