ArubaOS 8.6.0.0 - Aruba Networks

Multi-Version Licensing: ArubaOS 6.5.0.0 supports multi-version licensing, which allows centralized licensing clients to run a different version of the license than that of the primary and backup licensing servers. If a license is introduced in a newer version of ArubaOS, the primary and backup licensing servers set can still distribute licenses to licensing clients running an older version of ArubaOS, even if the licensing client does not recognize the newer license type.

ArubaOS 6.5.0.0 | Booches.nl

Does ArubaOS 6.X will be still deployed for at least next 5 years? Or it is going to be deprecated over 5 years and master-controllers architecture will be deprecated? If master-controllers architecture will be deprecated with ArubaOS 6 could we still use this architecture with ArubaOS 8, without mobility master, because my client is too small for full ArubaOS 8 architecture deployment :(

Overview. This course teaches you the advanced skills necessary to implement and operate enterprise level Aruba campus switching solutions. You will build on the skills you learned at the Associate level to configure and manage modern, open standards-based networking solutions using Aruba's OS-CX routing and switching technologies.

Implementing ArubaOS-CX Switching | QA Training

This 5-day hands-on course teaches you the fundamental skills necessary to configure and manage modern, open standards-based networking solutions using Aruba's OS-CX routing and switching technologies. It prepares network professionals for the Aruba Certified Switching Associate exam.

ArubaOS-CX Switching Fundamentals | QA Training

I took a Mobility Controller from the shelf and wanted it to get it configured as a standalone controller with ArubaOS 8. The controller was running 6.5 code, but the backup partition already contained an 8.0 code image and was previously managed by a Mobility Master during a workshop.
