Asthma | Brit-Thoracic

This guideline covers diagnosing, monitoring
and managing asthma in adults, young people
and children. It aims to improve the accuracy
of diagnosis, help people to control their
asthma and reduce the risk of asthma attacks.
It does not cover managing severe asthma or
acute asthma attacks. In February 2020, we

Access Free Asthma Guidelines

reviewed the evidence for increasing the dose of inhaled corticosteroids within a self-management programme in children and young people with asthma.

Overview / Asthma: diagnosis, monitoring and chronic ...

Scenario: Newly-diagnosed asthma: covers the management of children and adults with newly diagnosed or suspected asthma.; Scenario: Follow-up: covers the appropriate follow-up of children and adults who have asthma.; Scenario: Acute exacerbation of asthma: covers the management of an acute

Guidelines for primary care use only, both clinical and operational. Secondary Care.

Guidelines - Leicestershire Medicines Strategy Group

- to reduce the risk of serious asthma-related exacerbations and death, including in patients with so-called mild asthma,
- to provide consistent messaging about the aims of asthma treatment, including prevention of exacerbations, across the whole spectrum of asthma severity
- to avoid establishing a pattern of patient reliance on SABA early in the course of the disease.
