ASTRA Guide. ASTRA is an Agent Programming Language for people who wish to create intelligent distributed/concurrent systems that are built on the Java platform. It is designed to be easy to learn and familiar to developers who are experienced in using mainstream Object-Oriented Programming Languages. This has been achieved by designing ASTRA to be closely integrated with and influenced by Java.

Learning the ASTRA System. According to the Joint Commission, issues in hospitals that have contributed to non-compliance with IC.02.02.01 (Preventing Hospital Acquired Infections) include lack of staff training and competence assessment. The ASTRA automated probe disinfection system helps makes achieving compliance simple. Training your facility's clinicians to use the ASTRA in effectively cleaning your ultrasound probes is now even easier.

A sequence involves astronauts responding to a distress call only to be attacked by baboons. The appearance of the baboons is sudden and unexpected. One baboon's mouth is filled with blood from biting one astronaut. One character is mentally-unstable due to growing fanaticism and increasing social isolation.
