Astronomy Activity And
Laboratory Manual

This lab manual contains 20 in-class mathematical, paper-and-pencil activities (requiring only a pencil, straightedge, and common calculator) for college students in introductory astronomy courses. Following the development of astronomical thought, the activities relate to topics like the Moon, astronomy measurements, precision astronomy, the magnitude system, spiral nebulae, Hubble's Law, and Kepler's Third Law.

Laboratory Manual Full Books [ePub/PDF/Audible/Kindle] The activities require no specialized instructor training, equipment or individual materials beyond a pencil, straightedge, and standard calculator.

[PDF/ePub Books] Astronomy Activity and Laboratory Manual I teach college Astronomy. This lab manual is nicely written and contains useful information to present to students. The activities themselves are explained in a manner that makes them easy to tie into a lecture course or free standing lab. They are also useful in that they can be expanded upon.
