- PHD2 Guiding

By using autoguiding software such as PHD2 Guiding, our computer can communicate with the telescope mount. PHD2 Guiding is the successor to PHD Guiding, which I used for several years before upgrading to PHD2. PHD stands for "Push Here Dummy", and it very easy to use, once everything is set up properly.

Autoguiding a Telescope for Deep Sky Astrophotography ...

The camera, computer and software are often integrated into one unit in standalone autoguiders such as the popular Celestron NexGuide or Sky-Watcher SynGuider. Off-axis guiding has the advantage of eliminating a separate guidescope, thereby avoiding the potential for flexure and reducing load on the mount.

What is an autoguider? - skyatnightmagazine

The MGEN Autoguider offers the Random Displacement command. The Telescope is moved between exposures for just a few pixel, thus resulting in hotpixels to disappear and lower general noise when adding (stacking) multiple exposures. Using MGENs random displacement function increases overall image quality, it can even make dark frames obsolete!

Lacerta MGEN-3 The sensitive standalone autoguider

AutoGuider Image Scale: It is important that your image scale is very accurate. The best way to determine your image scale is to take an image with the *autoguider* (un-binned) and do a plate solve to resolve the actual image scale. If this is impossible, I would download Ron Wodaski's CCD Calculator to determine image scale.

AutoGuider Calculator V4.00

An autoguider is basically a camera that can either connect to your mount or a computer and tracks a specific star. When the selected star moves more than a specified amount away from the spot where it is supposed to be in the images the camera takes, it tells the mount to move a certain amount to keep that star dead in the center of the frame.

Best Autoguider and Guide Scope for 2020 - Astronomy Online

The Orion StarShoot AutoGuider provides a user-friendly, dedicated autoguiding camera for long-exposure astrophotography. It's compatible with virtually any mount equipped with an autoguider port and comes with all the software and cables needed to work right out of the box!

Orion StarShoot Auto Guider - Autoguiding ...

The Lacerta MGEN-3's simple alternative to 'full-on' guiding, one where a laptop and additional software isn't needed, is exciting. Opening the MGEN-3's box we were surprised by the lack of components. There's the autoguider control box (a lightweight 40g), a 1.2MP guide camera, two USB leads and an ST4 guiding cable.
