to determine which Automatic transmission fluid is appropriate for your Mini. Mini does not list any fluids other than the factory fluids, but several manufacturers lists their products as 'compatible' with factory fluids - these options are listed under 'Alternate Fluids'. The factory recommended interval for the automatic transmission is 100,000 miles and MINI states the manual transmission fluid is a 'lifetime fluid' that does not require fluid replacement.

and electronics that control all transmission functions. The one component of the entire system that's critical to all of these parts working properly together is the Automatic Transmission Fluid, or ATF. It acts as a hydraulic fluid, to engage clutch packs & shift the gears. It acts as a corrosion inhibitor and wear protection for the Planetary Gear sets.

Fluid Motion . All engines need lubrication of some kind.

Automatic transmissions use a special kind of fluid that serves a dual purpose by lubricating moving parts like a motor oil and also keeping the transmission from overheating like a coolant.

Manual transmissions, on the other hand, can accept a variety of fluids, depending on the make and model of the vehicle.

Can You Use ATF in a Manual Transmission?

There are two basic types of automatic transmission fluids. Traditional (or regular) automatic transmission fluids are made from natural oils that are combined with antioxidants and corrosion inhibitors. Synthetic automatic transmission fluids are man-made chemical polymers that perform the same functions.
