improve clinical practice based on the following steps: (1) pose a research question and hypothesis, (2) develop and implement a research plan, (3) perform data collection and analysis, and (4) present a research report. Each of these steps is critical for scientific inquiry and discourse.

Principles of Clinical Research
All of those involved in MRC-funded research should be honest in respect of their own actions and their responses to the actions of others. The research community must foster and support a culture of transparency and honesty which promotes good practice, recognises relevant interests or conflicts and deals with these openly and explicitly.

Section 1 Principles - Medical Research Council
The Introduction to the Principles and Practice of Clinical Research (IPPCR) course trains registrants on how to effectively and safely conduct clinical research. The course focuses on the spectrum of clinical research and the research process by highlighting biostatistical and epidemiologic methods, study design, protocol preparation, patient monitoring, quality assurance, ethical and legal issues, and much more.

Courses in Clinical Research
Principle 1: Research involving humans should be scientifi cally sound and conducted in accordance with basic ethical principles, which have their origin in the Declaration of Helsinki. Three basic ethical principles of equal importance, namely respect for persons, benefi cence, and justice, permeate all other GCP principles.

HANDBOOK FOR GOOD CLINICAL RESEARCH PRACTICE (GCP)
Ethical guidelines are established for clinical research to protect patient volunteers and to preserve the integrity of the science. NIH Clinical Center researchers published seven main principles to guide the conduct of ethical research: Social and clinical value; Scientific validity; Fair subject selection; Favorable risk-benefit ratio; Independent review

Guiding Principles for Ethical Research | National ...
Here are the 13 core principles of the ICH-GCP: Trials should be conducted in accordance with the Declaration of Helsinki and applicable regulatory requirements. Before trials begin, risks and inconveniences should be weighted against benefits for the trial subjects and society at large. A trial should only proceed if benefits outweigh risks.
