Becoming Batman: The Possibility of a Superhero is a 2008 science book by neuroscience professor E. Paul Zehr. The book was first published on November 7, 2008 through Johns Hopkins University Press and covers how much an ordinary person would need to train and adapt to become Batman. Becoming Batman is unique in its explicit analysis of whether or not it is actually possible for a human being to achieve Batman status through training.

Becoming Batman - Wikipedia

In probing what a real-life Batman could achieve, Zehr considers the level of punishment a consummately fit and trained person could handle, how hard and fast such a person could punch and kick and the number of adversaries that individual could dispatch, what it would be like to fight while wearing a batsuit, and the amount of food one would have to consume each day to maintain vigilance as Gotham City's guardian. A fun foray of escapism grounded in sound science, "Becoming Batman" provides ...

Becoming Batman: The Possibility Of A Superhero doesn't break down the history of the character but focuses on the physical and mental rigors needed. While Batman obviously needs to be in peak physical condition, one tip Zehr does emphasize is he doesn't have to be the BEST at any one discipline. He's not the fastest runner or the deadliest fighter in a given martial art, but he must at least have training in them.

Being a lifelong Batman fan myself, I purchased this book out of curiosity. The author brought a wealth of knowledge about physiology, martial arts, injury recovery, and, yes, Batman to the page. Although his knowledge on scientific aspects physiology and kinesiology seem a bit tedious at moments, Zehr does so to prove his premise — yes, Batman is possible.
