Chapter 4: Behavior, Motivation and Self-Control In chapter 2, we considered the general steps in self-help and what specifically we would like to change about ourselves. In chapter 3, we thought seriously about our values--what would add meaning to our lives. So, I will assume you now have some self-improvement goals in mind.

~~Behavior, Motivation and Self Control~~

Self-Control as a Pattern of Behavior While the physical independence of today and tomorrow is real enough, the fact remains that actions today affect actions tomorrow. Psychologist Howard Rachlin...

~~10 Strategies for Developing Self Control | Psychology ...~~

Self-control is an important skill that allows us to regulate behavior in order to achieve our long-term goals. Research has shown that self-control is not only important for goal attainment. While self-control is a limited resource, research also suggests that there are things that you can do to improve and strengthen your willpower over time.

After controlling covariates, motivation was also a significant factor for self-management. In the mediation analysis, motivation completely mediated the relationship between education and self-management, $z = 2.292$, $p = .021$. Motivation is an important part of self-management, and self-management education is not effective without motivation.

~~Motivation and Self Management Behavior of the Individuals ...~~

Self-control, an aspect of inhibitory control, is the ability to regulate one's emotions, thoughts, and behavior in the face of temptations and impulses. As an executive function, self-control is a cognitive process that is necessary for regulating one's behavior in order to achieve specific goals.. A related concept in psychology is emotional self-regulation.

~~Self control - Wikipedia~~

Executive function relates to behavioral elements associated with control and physical energy. It indicates the state of one's mental health and their self-control ability. Certain behaviors raise risks of mental health concerns such as bipolar disorder. An individual with behavioral problems may struggle with self-control.

Self-determination theory (SDT) is a macro theory of human motivation and personality that concerns people's inherent growth tendencies and innate psychological needs.It is concerned with the motivation behind choices people make without external influence and interference. SDT focuses on the degree to which an individual's behavior is self-motivated and self-determined.

~~Self-determination theory - Wikipedia~~

Extrinsic motivators can sometimes lower self-determination. According to Deci, giving people extrinsic rewards for already intrinsically motivated behavior can undermine autonomy. As the behavior becomes increasingly controlled by external rewards, people begin to feel less in control of their own behavior and intrinsic motivation is diminished.

~~Self-Determination Theory: How It Explains Motivation~~

The organizational self-control literature usually applies resource perspectives that explain self-control failure at work by depletion of self-control resources. However, these perspectives neglect the role of self-control motivation. On a daily level, we examine several self-control aspects (resources, motivation, demands, and effort) as predictors of a manifestation of self-control failure at work, namely daily counterproductive work behavior toward the organization (CWB?O).

~~Beyond depletion: Daily self-control motivation as an ...~~

In Studies 2 and 3--using self-reported motivation and teacher- and/or parent-reported self-control, and quarterly and final grades obtained from school records--we find that self-control, but not school motivation, helps to explain the gender gap in academic performance.

~~Will Not Want: Self Control Rather than Motivation ...~~

Findings suggest that self-control motivation is a crucial factor explaining self-control failure at work, and cast further doubt on the idea that exerted self-control effort is the only mechanism...
