Questions and answers on mineral oil components in food. In light of the knowledge that mineral oil components may be found in foods, the German Federal Institute for Risk Assessment (BfR) has conducted an assessment to determine whether mineral oil components in foods can pose a health risk. For a number of years now, the Institute has been pointing out that the transfer of mineral oil components from recycled cartons into foods is possible and is to be expected, as one of the materials ...

Questions and answers on furan in food. Updated BfR FAQ of 28 May 2020. Furan is a volatile compound that can form when food is heated. Particularly high concentrations of furan are found in roasted food such as coffee and convenience foods that are subjected to high temperatures in closed containers. In studies with rats and mice, high doses of furan lead to cancer.
