Using SMART Big Data, Analytics and - Bernard Marr

Big data techniques are already being used to monitor babies in a specialist premature and sick baby unit. By recording and analysing every heartbeat and breathing pattern of every baby, the unit was able to develop algorithms that can now predict infections 24 hours before any physical symptoms appear. That way, the team can intervene early and save fragile babies in an environment where ...

Big Data in Practice - Bernard Marr

The first V of big data is all about the amount of data—the volume. Today, every single minute we create the same amount of data that was created from the beginning of time until the year 2000. We now use the terms terabytes and petabytes to discuss the size of data that needs to be processed. The quantity of data is certainly an important aspect of making it be classified as big data. As a ...

What are the 4 Vs of Big Data?
