12. The Binomial Probability Distribution

In this lesson, we will look at how to use the Binomial Theorem to expand binomial expressions. Binomials are expressions that contain two terms such as $(x + y)$ and $(2 - x)$. The Binomial Theorem states that. Note that: 1) The powers of a decreases from n to 0 . 2) The powers of b increases from 0 to n . 3) The powers of a and b always add up to n .
