General maintenance and running advice for your Seagull Outboard Motor. 1 Run the engine in fresh water, ideally after every use in salt. If this is not possible, put a length of 3in (76mm) hose-pipe to the outlet hole and empty a gallon of water through the cylinder block to backflush the system. 2 Shut the fuel tap as you near your destination. It saves fuel, and ensures that the float chamber is empty and won't leak in the boot of the car.
