This book discusses bugs young children will most likely be familiar with in a very simple way: butterflies, ladybugs, daddy longlegs, grasshoppers, caterpillars, bees, ants, and roly-poly bugs. It's a good way to get toddlers and preschoolers thinking about the bugs they see every day and what the differences between them are.

The Technical Definition of a Bug Technically, or taxonomically, a bug is a creature that belongs to the insect order Hemiptera, known commonly as the true bugs. Aphids, cicadas, assassin bugs, ants, and a variety of other insects can claim rightful membership in the order Hemiptera.

*Identifying a Bug vs Insect - ThoughtCo*  
Typical household bugs can vary greatly depending on where you live, but some of the most common house pests include ants, bed bugs, cockroaches, and flies, not to mention rodents. To determine what kind of pests you are dealing with, we recommend using our bug identifier above, as well as hiring a pest control professional.

British Bugs Home - An online identification guide to UK Hemiptera. True bugs (Hemiptera) are one of the major groups of insects found in the UK, comprising nearly 2000 species. The purpose of this website is to illustrate as many of these as possible, since they are poorly covered by popular field guides. The availability of digital cameras has now made recording images of insects easier than ever before - but remember this can never be a substitute for collecting a voucher specimen.

*British Bugs Home - An online identification guide to UK ...*  
The illustrations are wild and wacky collages, showing insects with anatomical accuracy but also cartoonish personality. Eight insects are each described in rhyming phrases. At the end there is a page showing all the bugs in their actual size, and then there is a chart that lists the bugs and compares their characteristics (where does it live, how many legs, etc.)

A to Z of insects. The world of insects is as fascinating as it is diverse. You can find out information by browsing the list of insect orders or using this A to Z list:-

*A to Z of insects - Amateur Entomologists' Society (AES)*  
Insects (class Insecta) have segmented bodies, jointed legs, and external skeletons. Insects are distinguished from other arthropods by their body, which is divided into three major regions: (1) the head, which bears the mouthparts, eyes, and a pair of antennae, (2) the three-segmented thorax, which usually has three pairs of legs in adults and usually one or two pairs of wings, and (3) the many-segmented abdomen, which contains the digestive, excretory, and reproductive organs.
