The 3CPR Council's areas of focus encompass integrated cardiopulmonary physiology, critical care, emergency cardiovascular care, and CPR. The council takes a bench-to-bedside and community approach to clinical care, research, and basic science. Pulmonary hypertension and regulation of pulmonary circulation have been topics of ongoing attention.

Cardiac cycle efficiency (CCE) is a novel parameter that is directly related to the cardiovascular impedance. Since the aortic valve contributes to impedance, we hypothesized during an aortic valvuloplasty, performed for severe aortic stenosis, the cardiovascular impedance may decrease by the reduction of the transvalvular gradient.

Cardiac cycle efficiency: a new index for cardiac work ...

Heart failure is a frequent cause of cardiac arrest and vice versa, cardiac arrest frequently complicates acute heart failure episodes. We aimed to characterize the influence of cardiac arrest on outcome of acute heart failure patients admitted to hospital.

Resuscitated cardiac arrest in patients admitted with ...

DALLAS, Nov. 11, 2019 — One recent study found that opioid overdose victims who suffer cardiac arrest are distinctly different from other cardiac arrest patients, yet they may be more likely than others to survive long enough to be admitted to a hospital, according to preliminary research to be presented at the American Heart Association's Resuscitation Science Symposium 2019 — November 16-17 in Philadelphia.

Opioid-related cardiac arrest patients differ from other ...
