Hi guys, I have a 2000 International  
with the Cat c15, it doesn't take much  
of a hill and the exhaust temp gauge  
will go up to 1200, as soon as I back  
off and drop a gear it goes right down  
to around 300-400. What should I look  
for or is this normal for this engine?  
Thanks

This is because CAT is exiting the  
truck market, has a very bad  
reputation for reliability, and is known  
as a the worst engine for fuel mileage.

All of this is bad enough, but the C13  
has a history of actuator problems that  
are extremely problematic. Still, a  
Mercedes is even worse. The same  
truck with a Mercedes is \$19,000.

There's no job too big or too small for the world-class product line of industrial diesel engines from Caterpillar. With an industry-leading range from 8.2 to 6,100 kW (11 to 8,180 hp), Cat ® engines are tough enough to tackle the world's harshest environments while being flexible enough to configure to almost any machine.
