What is API 653? API 653 is the standard for tanks over 50 feet tall or having diameter greater than 30 feet. Covers the maintenance, inspection, alteration and repair of steel, field-erected aboveground storage tanks (ASTs) built to API 650 or API 12C standards. API 653 inspections must be performed by a licensed inspector. Brittle fracture assessment are covered under API 653.

API 653 Tank Inspections - ATS Environmental

The primary concern of the API 653 tank inspector is to look at the measurement data to determine whether the tank ' s structural integrity is fit for continued service. This analysis evaluates the corrosion level of the steel plates, the foundation integrity, the corrosion of the tank welds, and other detailed components of the tank. At the end of this analysis, the inspector may conclude that the tank requires and API 653 tank alteration for the tank to meet the operational standard. Such ...

Repurposing an API 650 Tank: Max Fill Height and API 653 ...

API-653 covers “ Tank Inspection, Repair, Alteration, and Reconstruction ” for larger Above-ground Storage Tanks (ASTs). Two types of inspections are defined in API-653: In-service and Out-of-service. An In-service inspection covers everything on the outside of the tank. Basically everything on the outside of the tank can be reached from outside the tank. So in a traditional API-653 inspection this can be done while the tank is “ in-service ” .

What is an API-653 inspection? - Manta Robotics LLC
