### Chapter 1: Diseases

INTRODUCTION Chapter 1 of ICD-10 classifies infectious and parasitic diseases that are easily transmissible (communicable). The primary axis for this chapter is the organism responsible for the condition. Infectious and parasitic conditions are classified in one of several ways, making careful use of the Alphabetic Index imperative.

**1. Chapter 1: Introduction.**  
Definition of Chronic Diseases Chronic diseases—heart disease, cancer, diabetes, arthritis, stroke, chronic lower respiratory disease, and others—are illnesses that persist over time, can gradually progress, do not resolve spontaneously, and may not be cured. They are leading causes of morbidity, mortality, disability, and decreased quality of life in the United States.<sup>1</sup>Chronic diseases account for at least 65% of all deaths, and about 84% of health spending ...
