AP Psychology Chapter 6: Sensation and Perception ...

Chapter 6: Sensation and Perception Outline Chapter Opener: No Pain, No Gain 6.1 Sensory System Principles. Sensation begins with a stimulus; All detection systems have thresholds; Psychophysics systematically analyzes perception; Detection involves finding a signal in a background of noise; A stimulus that doesn't change is unimportant, so sensory systems ignore it; 6.2 Touch and Pain

Outline

Chapter 6: Sensation and Perception sensation The detection of physical energy emitted or reflected by physical objects; it occurs when energy in the external environment or the body stimulates receptors in the sense organs (eyes, ears, tongue, nose, skin and internal body tissues) Perception is the process by which sensory impulses are organized and interpreted.

6_Sensation and Perception.docx - Chapter 6 Sensation and ...

Sensation and perception are two separate processes that are very closely related. Sensation is input about the physical world obtained by our sensory receptors, and perception is the process by which the brain selects, organizes, and interprets these sensations. In other words, senses are the physiological basis of perception.
