13 June, 2017. Children, like adults, need to practice good habits for optimum health. Proper nutrition, safety in and out of the home, and healthy practices such as exercise and wearing sunscreen will decrease your child's chances of health problems in the present and future. Teaching and modeling such behaviors can help your child embrace them for life.

Health Safety & Nutrition for Young Children | Healthfully

Early child development  Nutrition and the early years. Nutrition is fundamental for good health and development during the early years of life. If children do not eat the right amounts of macronutrients like protein, fat, and carbohydrates and micronutrients like vitamin A, iodine, iron and zinc, they may become ill, have delayed mental and motor development that can have enduring adverse effects beyond childhood, or die.
