Arts and creativity in early childhood

Abstract. The study aimed to identify first year BA (Hons) Early Childhood Studies students' perceptions of and confidence in, their own creativity, in an East Midlands university in the United Kingdom and to inform the teaching of a first year Play and Creativity module at the same institution. The Play and Creativity Module makes use of the 'democratic' definition of creativity (NACCCE, 1999) and Jeffrey and Wood's (2003) concept of 'teaching for creativity' by encouraging ...

Developing creativity in early childhood studies students

The impact of culture on creativity is typically manifested in three ways: (a) people from different cultures or settings have distinct implicit and/or explicit conceptions of creativity; (b) individuals from different cultures, particularly those from individualist and collectivist cultures, show differences in preferred creative processes and creative processing modes (e.g., usefulness seems more important than novelty in the East, whereas novelty seems equally important as usefulness, if ...

Lev Vygotsky (1896 -1934) was a Soviet psychologist who researched children's learning in social and cultural contexts. In particular, his theory of 'social constructivism' discussed the importance of social interactions in children's cognitive development. Vygotsky was also very interested in creativity and imagination how these were understood in education.

Vygotsky on collective creativity - Art Play Children

In an early childhood setting, educators must acknowledge that arts education is a site for creativity, where children can explore their identities and understandings of the world while continuously advancing their holistic development (Grierson, 2011).

Early childhood: Learning through visual art | Hekupu

In relation to children, the creative arts are activities that engage a child's imagination and can include activities such as art, dance, drama, puppetry, and music. They stimulate and help children cultivate their abilities across virtually every domain, and they are open-ended activities, fostering flexibility of the mind.
