Institution of Civil Engineers
Civil Engineering Case Study: Civil engineering is the engineering in the branch of building, which is aimed at the planning, designing, constructing, developing and improvement of the objects of public use, including buildings, warehouses, stations, roads, bridges, etc. Naturally, civil engineering is the oldest and the most developed branch of building, because the human civilization can not exist without the buildings of all kinds, which are used for different purposes.

"Beyond Failure" presents the circumstances of important failures that have had wide-reaching impacts on civil engineering practice. Each case study narrates the known facts of the situation: design and construction, the failure, subsequent investigation or analysis, and, where appropriate, additional issues such as technical concerns, ethical considerations, professional practice issues, and long-term effects.

Beyond Failure: Forensic Case Studies for Civil Engineers ...
