Mix the color with its complement (the color on the opposite side of the color wheel). For example, to lower the saturation of red, you could mix it with its complement, green. In a perfect world, mixing two complementary colors would eventually produce a pure gray.

Color Mixing and Application—The Ultimate Guide for Artists

A color mixing chart serves as a reference and learning tool to help artists gauge variations of pigments, as well as the properties that come along with these changes. They also provide information and inspiration as a gateway for discovering new shades. Normally, a mixing chart is laid out in chromatic order.

Color Mixing Chart 101: Basics of Mixing Colors

Color mixing 101 You can create your own color wheel for your reference with the colors you have. The key to mixing color is understanding the various aspects that make up any given shade: hue, chroma, and value. Put simply, the hue is what a layman might call the color itself; the chroma is the degree of saturation, and the value is the degree of lightness or darkness.
