~~Communication
Problems in ...~~

Communication
problems have always
been considered a core
feature of autism. Yet

Access Free Communication

there are substantial and wide-ranging differences in how people with autism communicate. That reflects not only the inherent variability of the condition, but also the complexity of communication itself — encompassing the words we use, the order in which we use them, eye contact, facial

Most children will not have any trouble with pronunciation. The problems lie in using language effectively.

~~Autism, PDD-NOS & Asperger's fact sheets | We Speak The Same Language | Communication ...~~

April 2, 2007

Communication is a social act, so it is not surprising that issues with both verbal and

Access Free Communication Issues In

non-verbal communication are central to autism. Three of the eleven children in Kanner's study never acquired speech; the remaining eight spoke in unusual ways. Some of them repeated words or phrases endlessly -- a process called echolalia.

their thoughts, opinions, experiences, feelings, and knowledge is essential to creating a meaningful life for them.

~~Speech Issues in Autism: Therapeutic and Communication Options~~

First, people with autism often use speech in idiosyncratic ways.

Access Free Communication

They may recite lines from a movie, talk endlessly about a favorite topic, or ask questions to which they already know the answer. Second, speech is just one part of social communication and, in many cases, spoken language isn't enough.
