that stems from the  
introductory computer  
systems course we  
developed at

University, starting in  
the Fall of 1998,

Programmers come from a variety of backgrounds, but many follow one of two paths. Some learn programming as part of a formal computer science or information technology degree program, while others start out in a related area of IT, such as

tech support or Web design, and pick up programming along the way. Some even started programming as kids.
