Choosing in menu requires 4 moves (up to menu from graphic, click, down to "Snap to", right and another click, and down to graphic again) instead of 1 key click. Is there any reason for not being able to create a shortcut for this two commands??? Or is it another Corel sloppiness in this version? 0 harryLondon over 6 years ago in reply to Cubica

Snapping objects. When you move or draw an object, you can snap it to another object in a drawing. You can snap an object to a number of snap points in the target object. When the pointer is close to a snap point, the snap point is highlighted, indicating it as the pointer's snapping target. To snap an object to another object with greater precision, you first snap the pointer to a snap point in the object, and then snap the object to a snap point in the target object.

Unfortunately the "snap-to-itself" function can not be turned off in Draw, I think it should be. Anyway, two simple ways to get around it: 1. Temporarily disable guideline snapping, just as Myron and Eskimo said. You can also assign a shortcut key to this command, if this is something you do a lot. 2.
