Difference Between Corporate Finance and Project Finance. Corporate financing refers to the financial management of an overall company like deciding the financial model of a company then raising the finance and optimal utilization of funds and enhancing the working of the company whereas project financing refers to taking financial decision for a project like sources of funds, contract with vendors and negotiation.

*Corporate Finance vs Project Finance |
Top Differences*

Project Finance Modeling. Most project finance models have to start with some assumptions – how much you estimate to spend constructing the project, what percentage of financing will come from equity financing versus debt, and also the cost of different debt items.

*Project Finance Overview - Analysis and
Modeling ...*

Project finance modeling is an excel based analytical tool used to assess the risk-reward of lending to or investing in a long-term infrastructure project based upon a complex financial structure. All financial evaluations of a project depend upon projections or expected future cash flows generated by activities of a completed project and a financial model is built to analyze this.
