Corporate financial reporting is defined as providing capital market participants with information for financial decision-making. Corporate financial reporting is an essential activity for all businesses to provide investors and creditors with information for lending or investment decisions.

Definition of Corporate Financial Reporting | Bizfluent

The theory of the firm is an important field of study in economics. It helps us to answer questions such as why firms exist, why market prices exist for some items and not for others, and why there is a demand for accounting information. The report argues that an approach to financial reporting measurement that reflects firms' business models is both consistent with what the theory of the firm teaches us and desirable in its own right.

Impact of corporate governance reforms on disclosures. In general, almost all countries have issued general guidelines for governance, social and environmental reporting, but it would result only as a tick-in-the-box activity unless it is checked to what extent the corporate world is responding and reporting as per the new reforms.
