Objectives and Syllabus. Provides an appreciation of the principles of measurement and principal design features of a variety of instruments and develops an understanding of the importance of good measurement for effective control. Topics include metrics of measurement: pneumatic, electrical & digital signals: principles of measurement; common sensor design features, criteria for sensor selection, installation, operation and use: analytical measurements: control valves; characteristics ...

Course Syllabus Measurements And Instrumentation

Overview: 2.671 is a 12-unit undergraduate course in measurement methods and experimental techniques required of all Mechanical Engineering majors that is typically taken in the junior year. The course features a self-directed term-long assignment created by Prof. Ian Hunter to give the students an opportunity to make measurements on something of personal interest to them, referred to as Go Forth and Measure.
